

Make Your Own Printed Circuit Board

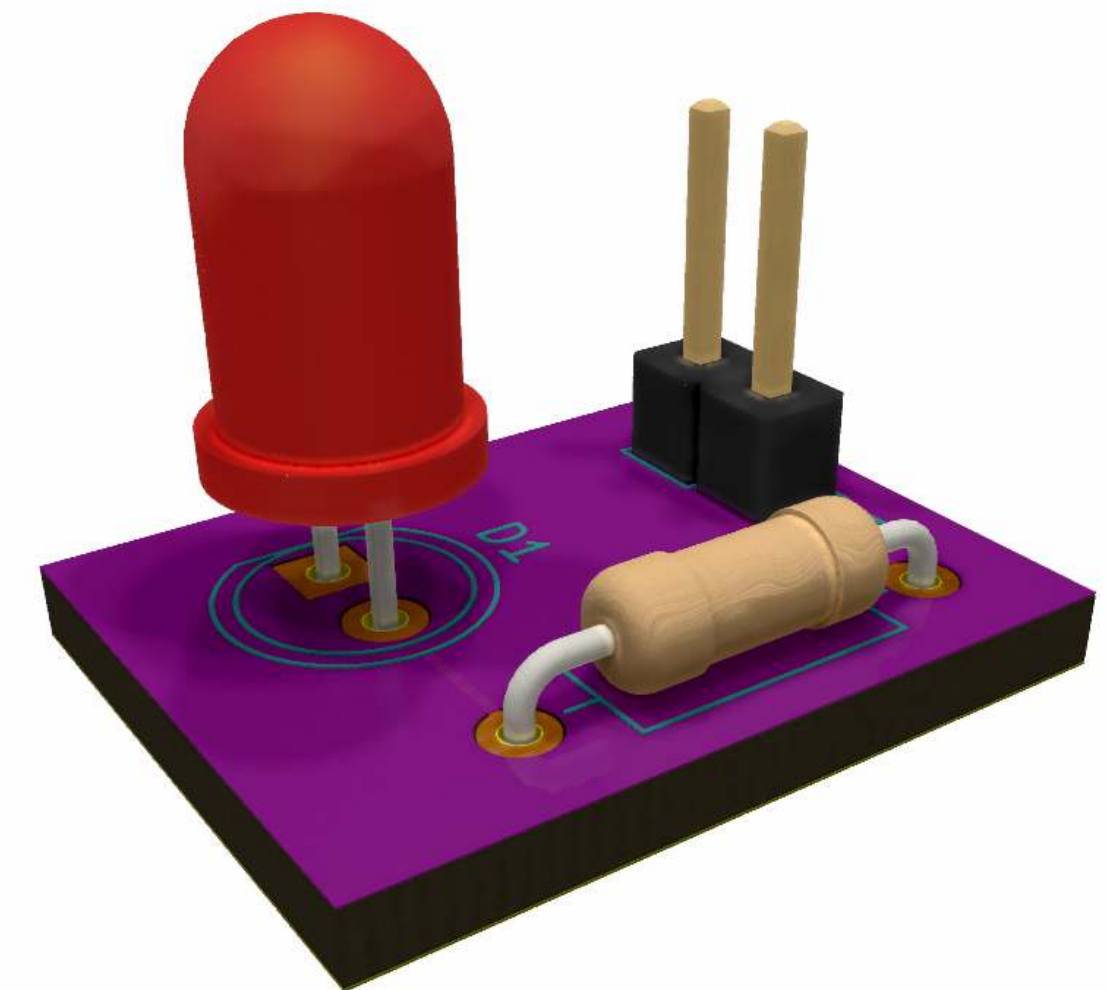

Session 1

(we'll be starting shortly!)

Why Make A Printed Circuit Board?

- Much easier to build circuits with lots of connections
- Easy to copy and build interesting designs you find online
- Easy to build many of the same circuit

Before next session:

- Install KiCad
- Make a simple board with a resistor, LED, and battery by following the PCB design checklist
- Post a screenshot of your design in the workshop forum thread
